

# E-Touch IV50

## Multi Kiosk Locker

### IV50 Lockers

The IV50 comes standard as a 10 door locker system.

Versions with smaller or larger doors are available to offer the perfect storage solutions.

Multiple Kiosks are also available.

### Store & Charge

Allows the Issue and Return of valuable assets. Charge power tools or IT equipment to ensure your work force has what they need when they need it.

### Multi Kiosk

Flexible System available as a master machine with 10" to 42" screen or as an add on unit to create a cost effective solution.

### Suggested Inventory

- Power Tools
- PPE (i.e. hard hats, welding gloves & masks)
- IT Equipment
- Smart devices
- Handsets
- Headsets
- Laptops

The IV50 offers Access Control, giving you the ability to manage the distribution and return of valuable items at the point of use.

The most cost effective lockers on the market. Enables a way to manage oversized products or gauges and assets such as hand held terminals, laptops, phones PDA's etc.

The main issue with lockers to date is that they can only be controlled by one kiosk. IVTS have developed a solution where multiple kiosks can operate the same set of lockers.

# IV50 Configurations

Easily configured on site. The removable shelves enable larger lockers to be created. IVTS have multi-height doors available so the 300mm x 300mm doors can be changed to 150, 300, 450, 600 or 750mm high.

Custom lockers available by request.

Pick by Light to aid the user a colour is applied to one of the kiosks, when the instruction is given to open a door number the LED is turned on in the same colour as the screen.

Specification
